

# **On the existence of monotonic fronts for a class of physical problems described by the equation $\lambda w''' + w' = f(w)$**

R. D. Benguria & M. C. Depassier

## **Abstract**

We obtain an upper bound on the value of  $\lambda$  for which monotonic front solutions of the equation  $\lambda w''' + w' = f(w)$  with  $\lambda > 0$  may exist.
